

Cod.:4242

# ROYAL JELLY

## Description

The royal jelly is naturally produced by young worker bees. It is used to feed queens bees and their larvae. This food causes the queens bees to live around 5 years, while the worker bees live approximately 45 days. The royal jelly is also responsible for fertility of queens bees, while the worker bees remain sterile for a lifetime. The benefits of royal jelly can be explained by its composition, as it has large energy and antioxidant properties. In its composition we find 13% carbohydrate, 12% protein, 5% lipids, 3% vitamins, enzymes and coenzymes and 1% mineral salts.

## Presentation

Classification: Capsule food supplement.  
Capsules: 60 500mg capsules  
Net Weight: 30g

## Conservation and Warnings

Sealed for your protection. Do not use if seal is missing or broken. Best stored at controlled room temperature 20°C to 25°C (68°F to 77°F). Improper storage conditions such as exposure to direct sunlight, high heat & humidity can cause product degradation over time.
