Honey

EUCALYPTUS FLOWER HONEY

Description

Honey can vary a lot according to the flower that the bees look for nectar, providing differences of its constituents and, in characteristics such as the aroma, taste and color.

Honey Flores Silvestres, is extracted from a great diversity of flowers and that may vary according to the flora of the production region. Your coloring is more intense and dark, the aroma is diverse and the flavor is more pronounced. It's the variety most produced and consumed in Brazil.

Among its pharmacological properties, we can highlight its action as antimicrobial, antiseptic, anti-inflammatory, antibiotic and immunostimulant.

Great antioxidant, it is an important ally against premature aging, preventing degenerative diseases such as atherosclerosis, cardiovascular disease and neurological; besides favoring the health and beauty of the skin, nails and hair.
