Honey

ORANGE FLOWER HONEY

Description

Honey can vary a lot according to the flower that the bees look for nectar, providing difference from its constituents and, in characteristics such as the aroma, flavor and colors.

Orange Blossom Honey, has lighter colors, the flavor is floral, more smooth and delicate, as well as slightly citric, being much appreciated by chefs cuisine in sophisticated dishes.

Among its pharmacological properties, we can highlight its action as a antioxidant, antibacterial, antiseptic, anti-inflammatory and antibiotic. So it is an excellent immune stimulant, it helps in the fight against the flu, colds, sore throats and diseases of the tract in general; besides helping in skin healing and hydration. It is a great ally in intestinal health and regulation, and due to the active principles of orange blossom, it is recognized as a natural tranquilizer.
